

SoftSecure Technology™ - Overview

SoftSecure Technology™ (SST) is the newest innovation from Liphatech. A rodenticide placement device specifically designed for soft bait, SST allows faster bait station servicing and the use of soft bait without paper. No paper means no mess. Simply remove and discard the pouch and place the rodenticide in the SST. It also works with traditional block baits. The SST is designed for the Aegis line of bait stations and is compatible with many others including Protecta LP, Protecta EVO Express, Protecta Sidekick, EZ Klean, Rodent Café®, and Checkpoint.

- Easily snaps into the bait station. No need for rods.
- 10g & 40g FirstStrike, 12g & 40g Resolv and traditional blocks can all be used.
- PMP can place bait directly on the SST without the paper pouch – no more paper shreds.
- Available 12 SSTs per case or 15 SSTs included with a 16 lb. pail of FirstStrike or Resolv soft bait.
